ORTHODONTICS

WHY DO I NEED SPARE RETAINERS?

Your retainers are made from the highest quality materials, but they will not last forever.

They can break, get accidentally damaged, the dog may chew them or you may simply just lose them.

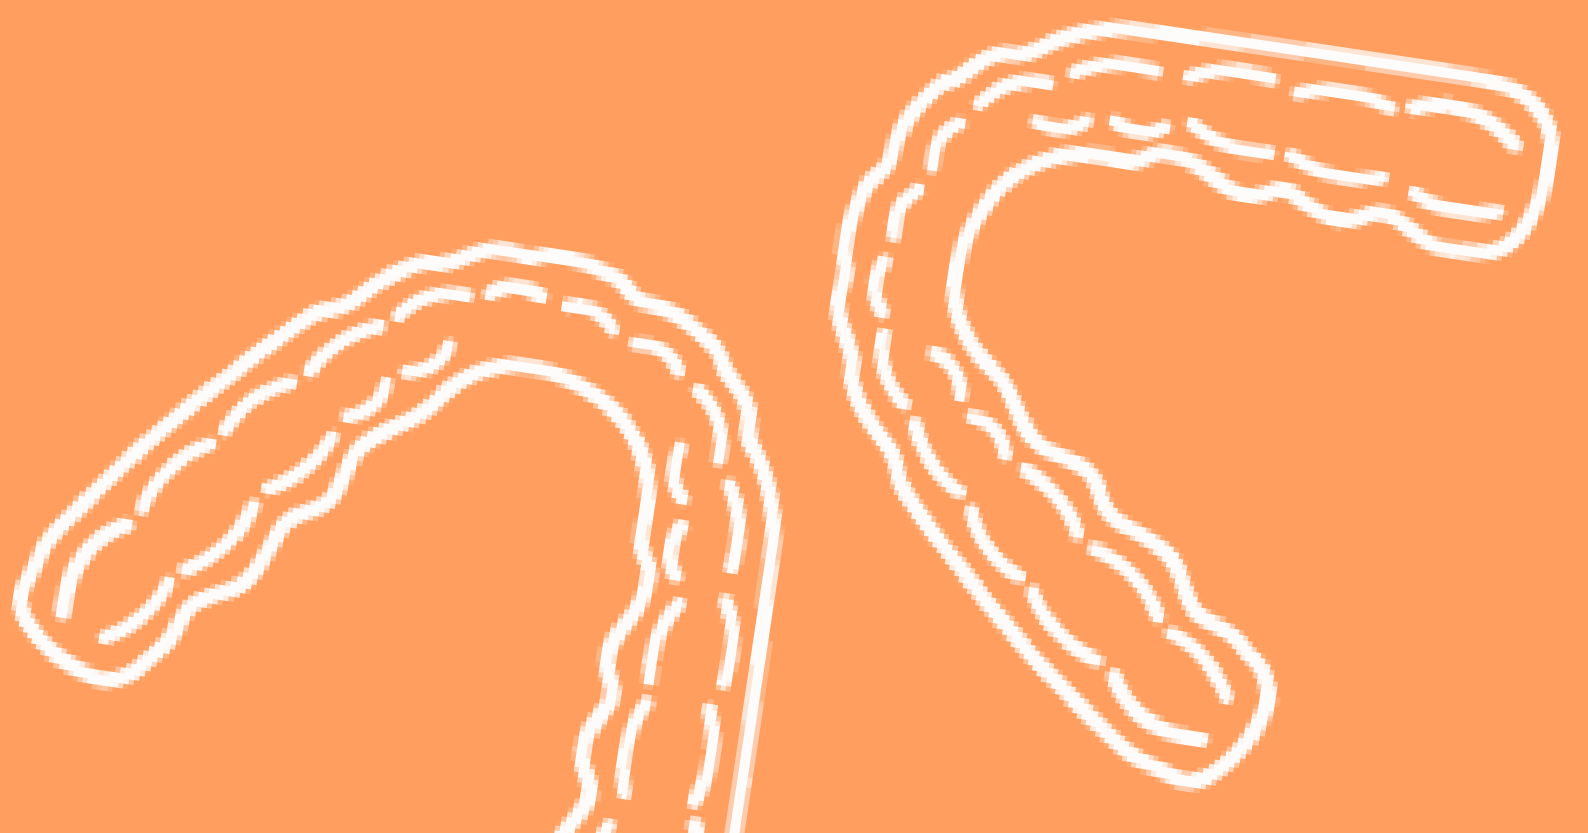

Regardless, you will not want your teeth to move and become crooked so you will need to get another set.

For this reason you will be thankful you have at least one spare set, like a spare tyre when you have a flat!

Please turn over to see what options are available.
